Claims 9-25 are pending in this application. The rejection of the claims under 35 U.S.C. 102(b) as anticipated by Burckhalter et al., Stokker et al., Cragoe, Jr. et al. and Finn et al. are withdrawn in view of applicants' amendments.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 9-25 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Burckhalter et al. for the reasons of record. Applicants' arguments have been given due consideration, but are found non-persuasive. Burckhalter et al. disclose compounds of the formula at the top of the right column of page 1894 as antimalarials and who disclose 2-[(diethylamino)methyl]-3,5-dimethylphenol. R1 may be H or alkyl, R2 may be alkyl, and R may be hydrogen or alkyl. Contra applicants' arguments, Burckhalter et al. do disclose a very close compound. Additionally, applicants, for

example, claim 4, 6 di-substituted compounds and, for example, 5-tert-butyl, 3-methyl compounds.

Claims 21 and 22 are again rejected under 35 U.S.C. 103(a) as being unpatentable over the combined teaching of Cragoe, Jr. et al., US 3,794,734, for the reasons of record. Applicants' arguments have been given due consideration, but are found non-persuasive. Cragoe, Jr. et al. disclose 2-(aminomethyl)-3,5-bis(1,1-dimethylethyl)phenol hydrochloride which is very close to applicants' compounds. Applicants, for example, claim the homologues, 2-(2-aminoethyl)-3,5-di-tertbutylphenol and 2-(1-aminoethyl)-3,5-di-tertbutylphenol as well as 2-aminomethyl-5-tert-butylphenol.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
